COSC2781 (PG) Semester 1 2026 | Project Rubric (all deliverables)

Components	Weight	Elements	Excellent (7)	Good (5)	Fair (3.5)	Poor (2)	NN (0)
Week 12 Update	**20%**						
Progress Demonstration	**14%**	(1) Conduct live demonstration; (2) Project progress against the negotiated schedule; (3) Demonstration of the project; (4) Plan for completion.	**Conduct** demonstration of current project progress	**Conduct** demonstration of current project progress	**Conduct** demonstration of current project progress	**Describe** the current project progress, without a demonstration	Project is substantially incomplete
			Project is **ahead of or on-track** according to the negotiated schedule	Project is **on-track** according to the negotiated schedule	Project is **marginally behind** the negotiated schedule	Project is **very behind** the negotiated schedule	
			Demonstrate a **minimally viable solution** to the project	Demonstrate **substantial** progress towards a minimally viable solution to the project	Demonstrate **satisfactory** progress towards a minimally viable solution to the project	No substantial live demonstration	
			Describe a **feasible** plan for completion of the project by the scheduled demonstration date.	Describe a **feasible** plan for completion of the project by the scheduled demonstration date.	Describe a plan for completion of as much of the project **as possible** by the scheduled demonstration date.	Describe a plan for completion of as much of the project **as possible**, by the scheduled demonstration date.	
				Good (2)	**Fair (1)**	**Poor (0.5)**	**Incomplete (0)**
Experimental Analysis	**4%**	(1) Plan for experimental evaluation is prepared; (2) Quality and detail of experimental plan.		Describe a **feasible** plan for experimental evaluation of the project by the scheduled demonstration date. The plan **clearly** has considered how to evaluate the strengths and limitations of the project.	Describe a **feasible** plan for experimental evaluation of the project by the scheduled demonstration date, however, the plan **is missing** satisfactory means to evaluate the strengths and limitations of the project.	The experimental plan is **minimally prepared** or **vague** and unlikely to be able to be successfully completed as described.	Plan is substantially incomplete.
						Complete (1)	**Incomplete (0)**
Risk Assessment	**2%**	(1) Approved Activity Risk Assessment				Prepared an **approved** Activity Risk Assessment. Reasonable risks are captured.	Activity Risk Assessment **was not approved** by the Week 12 update date.
Demonstration	**40%**		**Excellent (10)**	**Good (8)**	**Fair (6)**	**Poor (3)**	**NN (0)**
Demonstration of Project Implementation	**20%**	(1) Conduct live demonstration; (2) Quality of the demonstration towards the negotiated project requirements; (3) Delineation of work from existing literature, software and dependencies; (4) Preparedness of the demonstration, including setup time, configuration, restarts, and delays.	**Excellent** demonstration that **clearly** shows that the project **meets** the negotiated requirements.	**Good** demonstration that **mostly shows** that the project **meets** the negotiated requirements, but **minor** aspects of the project may have issues or errors.	**Sufficient** demonstration that shows that the project meets the **majority** of the negotiated requirements, but **significant** aspects of the requirements are missing.	A demonstration is **conducted** that shows that final state of the project, however, the demonstration does not meet minimal requirements.	Insufficient for Poor category
			Demonstration **clearly distinguishes** the student's work from existing literature, software and dependencies.	Demonstration **distinguishes** the student's work from existing literature, software and dependencies, with **minor** issues.	Demonstration **may not** satisfactory distinguish the student's work from existing literature, software and dependencies, however, the work is satisfactory original.	The student's work **is not distinguished** from existing literature, software and dependencies.	

			Demonstration is **well-prepared**, is conducted live, and fully ready to be conducted.	Demonstration is **mostly well-prepared**, and is conducted live. **Minimal** time is lost for issues.	Demonstration is **prepared**, and is conducted live. **Significant** time is lost for issues.	Demonstration is **ill prepared**, and not conducted live. Demonstration significantly depends on supplementary material or recordings.	
			Excellent (5)	**Good (4)**	**Fair (3)**	**Poor (1.5)**	**NN (0)**
Demonstration of Evaluation and Results	**10%**	(1) Quality of the demonstration and discussion of the evaluation of the work against the negotiated requirements.	**Excellent** discussion of the evaluation of the work, that **clearly presents** the strengths and weaknesses.	**Good** discussion of the evaluation of the work, that **presents** the strengths and weaknesses.	**Satisfactory** discussion of the evaluation of the work, with a minimally satisfactory coverage of the strengths and weaknesses.	**Attempt** at discussing of the evaluation of the work.	Insufficient for Poor category
			Conducts a demonstration of some results.	**Conducts** a demonstration of some results.	**May conducts** a demonstration of minimal results.		
			Excellent (5)	**Good (4)**	**Fair (3)**	**Poor (1.5)**	**NN (0)**
Individual Contributions	**10%**	(1) Teamwork Organisation: regularity activity, timeframe of completion of tasks; (2) Teamwork Contribution: quality, and regularity; (3) Teamwork Communication: regularity and suitability;	Team member has **significant** activity, and **regular** completion of tasks over the entire course of the assessment as evident in project materials.	Team member has **satisfactory** activity, and **regular** completion of tasks for the **majority** of the assessment as evident in project materials.	Team member has **some lack** of regular activity, and/or late completion of tasks at times during the assessment, as evident in project materials.	Team member has **sporadic** or late activity, and/or an **untimely** completion of tasks, throughout the assessment as evident in project materials.	Insufficient contribution
			Team member has **significant** and **regular** contribution to project over the entire course of the assessment as evident in project materials.	Team member has **satisfactory** and **regular** contribution to project for the **majority** of the assessment as evident in project materials.	Team member has **some lack** of regular contribution to the project at times during the assessment as evident in project materials.	Team member has **some contribution** to the to the project, but the contributions are **minimally sufficient** and on an irregular basis throughout the assessment, as evident in project materials.	
			Team member maintains **regular** communication with the other team member(s) as evident in project materials.	Team member maintains **satisfactory** communication with the other team member(s) as evident in project materials.	Team member has **some lack** of regular communication with the other team member(s) at times during the assessment.	Team member has **minimal**, **inconsistent** and/or **irregular** communication with the other team member(s).	
Final Report	**40%**		**Excellent (10)**	**Good (8)**	**Fair (6)**	**Poor (3)**	**NN (0)**
Methodology and Analysis	**20%**	(1) Description of methodology and approach towards completing the negotiated requirements of the project; (2) Technical description of project including software, launch files, configuration, and implemented; (3) Description of the implemented software; (4) Description and Justification of the choice of Robot Software Architecture; (5) Analysis of the software capabilities.	**Excellent** description of methodology, providing a complete picture of how the project is completed.	**Good** description of methodology, providing a mostly complete picture of how the project is completed, with some minor questions remaining.	**Satisfactory** description of methodology, providing how the project is completed, with some important questions remaining.	The report is **minimally attempted** but does not provide a suitable picture of how the project is completed.	Insufficient for Poor category
			Excellent and **complete** technical description of the ROS package components.	**Good** and **mostly complete** technical description of the ROS package components. Some details are missing.	**Fair** technical description of the ROS package components. Important details are missing, without which the package cannot be sufficiently understood.	**Attempt** at describing the ROS software, but it is sparse, poorly described, and significantly incomplete.	
			Excellent and **complete** description of the Robot Software Architecture, with **excellent** justification with **well-supported** reasoning.	**Good** and **mostly complete** description of the Robot Software Architecture, with **good** justification however, there are **some flaws**.	**Fair** description of the Robot Software Architecture with a **satisfactory** justification. The choice is suitable, however, the reasoning is **missing critical information**.	**Attempt** at describing and justifying the choice of Robot Software Architecture, however, there are **better approaches**, and /or the description is poor and significantly incomplete.	

			Excellent analysis of the final deliverable, providing a **clear understanding** of software capabilities, with supporting evidence.	**Good** analysis of the final deliverable, providing an **understanding** of the software capabilities, with supporting evidence, but has **some flaws**.	**Satisfactory** analysis of the final deliverable, but has a **limited understanding** of the software capabilities, but has **important gaps**, and limited supporting evidence	**Minimal to no** analysis of the final deliverable, with **minimal** supporting evidence.	
			Excellent (5)	**Good (4)**	**Fair (3)**	**Poor (1.5)**	**NN (0)**
Experimental Design and Evaluation	**10%**	(1) Design of the experiment to evaluate the project; (2) Critical Evaluation of the project in relation to the negotiated requirements; (3) Quality of quantitative and/or qualitative experimental results; (4) Evaluation of the strengths and limitations;	**Excellent** experimental design of the capabilities of the final deliverable, with **well-supported** experimental evidence.	**Good** experimental design of the capabilities of the final deliverable, however, there are **some flaws** that may not fully explore the work's capabilities.	**Satisfactory** experimental design of the capabilities of the final deliverable, but at least one key experiment is **missing**.	**Attempt** at an experimental design of the capabilities of the final deliverable. There **may not** be satisfactory consideration of experiments, and such as being equivalent to a simple demo.	Insufficient for Poor category
			Excellent critical evaluation of the final deliverable, providing a **clear understanding** of the strengths and weakness of the software.	**Good** critical evaluation of the final deliverable, providing an **understanding** of the strengths and weakness of the software, but has **some flaws**.	**Satisfactory** critical evaluation of the final deliverable, but has a **limited understanding** of the strengths and weakness of the software, but has **important gaps**.	**Minimal to no** critical evaluation of the final deliverable.	
			Evaluation provides **well-supported** experimental evidence, showing all aspects of the software capabilities.	Evaluation provides **supporting** experimental evidence, however, there are **some flaws**, or the evidence is not clear.	Evaluation provides **minimally satisfactory** experimental evidence, however, key results are **missing**.	There is some experimental evidence but the evidence **may not** be clear or does not support the evaluation.	
			Excellent (5)	**Good (4)**	**Fair (3)**	**Poor (1.5)**	**NN (0)**
Writing style and Referencing	**10%**	(1) Quality of written report, including figures and tables; (2) Appropriate citation and referencing. (3) Inclusion of Log of the use of AI tools	Report is **well-written** and adheres to the academic writing practices. Figures and tables are **clear and legible**.	Report is **mostly well-written** and adheres to the academic writing practices, with **minor issues**. Figures and tables are **legible**.	Report is **satisfactorily** written and can be satisfactorily understood. Some figures and tables are **provided**, it is not easy to interpret their relevance.	Report **does not** adhere to the academic writing practices, but is readable. Figures and tables may be **missing**.	Insufficient for Poor category
			All relevant literature and dependent software is **fully** cited, with a consistent and legible referencing format.	**All** relevant literature and dependent software is **fully** cited, with a consistent and legible referencing format.	**Most** relevant literature and dependent software is **correctly** cited with a consistent and legible referencing format.	**Some** relevant literature and dependent software is **correctly** cited with a consistent and legible referencing format.	
			Log of the use of AI Tools is provided.	Log of the use of AI Tools is provided.	Log of the use of AI Tools is provided.	Log of the use of AI Tools may not be provided.
